SQ & QS Test Tones

The test tones are phase and amplitude correct and can be relied upon to decode correctly given accurate software or hardware decoding. All test tones are 1Khz at -3dB, recorded at 44.1Khz 16 bit as WAV files (FLAC encoded to save space). Extract from the RAR file and convert from FLAC to WAV.

SQ

Tone sequence is:

Centre Front - Right Front – Centre Right – Rear Right – Centre Rear – Left Rear – Centre Left – Left Front – Centre Front

QS

Tone Sequence is:

Centre Front - Left Front – Centre Left – Rear Left – Centre Rear – Right Rear – Centre Right – Right Front – Centre Front
