

DO TRUST YOUR EARS

Hi-Fi Stereo/Quadro Receiver SA-514

A new highlight in the traditional line of Toshiba Hi-Fi receivers. Quadro unlimited and Stereo at its best.

Quadro Decoder

for RM, SQ and Discrete modes and de-modulation of CD-4.

FM Muting

for suppression of interstation noise.

Two Tape Monitor Push-Buttons

permit the connection of two tape recorders for dubbing from tape onto tape.

Loudness Contour Circuits

and two Auxiliary inputs for the connection of additional sound sources; Hi and Low filters for the suppression of noise on older records and tapes.

Four Level-set Controls

for separate control of each channel plus master volume control.

OCL-Circuits

in the power amplifiers eliminate capacitors for optimum transient response.

FETs and Ceramic Filters

in the tuner and IF sections ensure low-noise reception combined with excellent sensitivity.

BTL-Circuits

provide Stereo reproduction with two speakers using the full power of four channels.

Multiple Speaker Switch

for complex switching of up to 8 speakers in two groups.

Technical Data:

Ranges FM 87.5 — 108 MHz

MW 530 — 1605 kHz

Output 2x50W r.m.s.(BTL-8ohms)

4x25W r.m.s.(8ohms)

Impedance 4 — 16 ohms

8 — 16 ohms BTL
